

VersaTract Arena Understructure

Introducing VersaTract, the industry's most Versatile Retractable system! VersaTract not only boasts the broadest capabilities available today, it's designed to outperform and outlast all other systems and is backed with the industry's best warranty!

Key Advantages:

- VersaTract is a highly engineered, heavy-duty system designed for ease of operation and long life cycle value – and backed by the industry's first 10-Year Understructure Warranty.
- Available with Infinity seats, Integra or Prestige Series chairs.

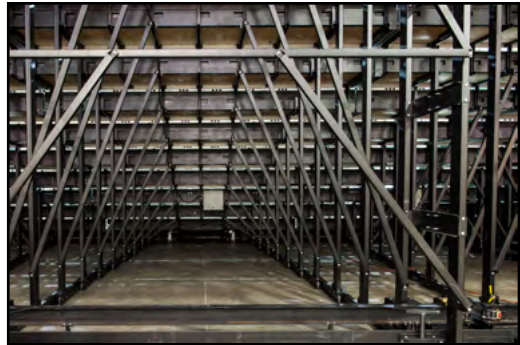

Heavy triple formed 10-gauge cantilever arm increases strength and stability to the deck system. Nylon pads prevent steel fatigue by eliminating metal to metal contact.

Post columns use a minimum 2" x 6" 11-gauge tube, welded 360° to a 2" wide wheel channel. The 10-gauge row locks secure each row in the open position. Wheel size is 5" x 1-3/8".

Rear riser beam and beam stiffener are formed from 14-gauge steel for maximum deck strength. The upper alignment roller and lower Integral Alignment System working together achieve unparalleled performance while remaining virtually maintenance free.

Sway bracing is constructed using a minimum 1-1/2" 14-gauge square tubing. Nylon glides and rollers make VersaTract a completely lubrication-free system, reducing cost of ownership while extending life-cycle value.

The lower Integral Alignment System (IAS) interlocks adjacent wheel channels together for true straight-line and repeatable operation, while preventing accidental row separation.

Deck supports include a unique dual purpose roller that provide support and alignment during operation.

Dimensional Options:

- Standard row rise options: 4" – 24" (Custom and parabolic row rise also available).
- Standard row spacing options: 30" – 42" (available in 1" increments).
