

# VersaTract Understructure

Introducing VersaTract, the industry's most Versatile Retractable system! VersaTract not only boasts the broadest capabilities available today, it's designed to outperform and outlast all other systems and is backed with the industry's best warranty!

## Key Advantages:

- VersaTract is a highly engineered, heavy-duty system designed for ease of operation and long life cycle value – and backed by the industry's first 10-Year Understructure Warranty.
- Field adjustable row spacing.
- Available with Infinity seats, Integra or Prestige Series chairs.

The lower Integral Alignment System (IAS) interlocks the adjacent wheel channels for true straight-line and repeatable operation, while preventing accidental row separation.

Nylon glides and rollers make VersaTract a completely lubrication-free system, reducing cost of ownership while extending life cycle value.

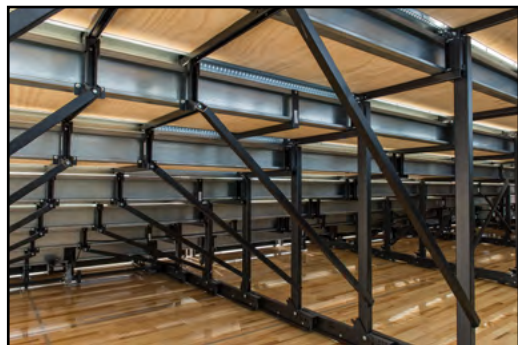

Post columns use a minimum 2" x 3" 14-gauge tube, welded 360° to the 2" wide wheel channel. Heavy duty 10-gauge row locks secure each row in the open position. Non-marring 5" x 1-3/8" wheels are used.

Heavy triple formed 10-gauge cantilever arm increases strength to the deck system. Nylon pads prevent steel fatigue by eliminating metal to metal contact.

Deck supports include a unique dual purpose roller that provide support and alignment during operation.

Sway bracing is constructed using a minimum 1-1/2" 14-gauge square tubing and begins on row two.

## Dimensional Options:

- Standard row rise options: 10", 12", 14", 16" (Custom row rise also available).
- Standard row spacing options: 22" – 26", 28" – 30", 31" – 33", 34" – 36" (available in 1" increments).
